

Standards of Progress:

The Standard of Progress policy for Practical Nursing students requires that an average of 76% be maintained for each course both theory and clinical. If a student has an average below 76% in any one course for a grading period (the end of the course and/or semester), the student cannot complete the program and will be terminated from school. Students must also pass the IV workshop to progress to the third semester. Students must pass the Quick Med Guide test to graduate. This test is taken one time.

If unable to perform a required skill check off on the week that it is due, this will result in immediate termination from the program.

If a clinical institution refuses training site experience to a student, he/she will be unable to meet the clinical objectives and thus would not pass the course.

A student terminated for disciplinary reasons may not reenter the program.
